Cenote Diving AND Ocean Diving!!!

May 18 - May 25, 2012

This trip to the Maya Riviera offers a unique diving experience for everyone...ocean diving along the second longest barrier reef in the world and the exploration of an incredible and unique eco-system. Created naturally over 6,500 years ago, Cenotes or 'sacred wells' are areas which have filled with crystal clear, fresh water and now open into a vast system of underground caverns, tunnels and chambers. For thousands of years, these caves had been dry, forming stalagmites, stalactites, columns and flow-stones, now you can come discover them for yourself!!!

A pre-trip meeting makes sure you get everything you want out of your trip including PADI specialty course certifications, discount pricing on any rental equipment you may need and a retail discount for any new purchases you just must have! A post-trip get together allows you to relive your adventures and share photographs, videos and memories.
